

MAXFORCE<sup>®</sup>  
**COMPLETE**  
IS SO DELICIOUS  
THEY CAN'T RESIST.

SO EFFECTIVE THEY  
WON'T BE BACK FOR SECONDS.

AND NEITHER WILL YOU.

With new Maxforce Complete BRAND Granular Insect Bait,  
the name says it all.

Our **Complete** nutrition and range of particle sizes means better bait acceptance against a broad spectrum of ants, cockroaches, crickets, silverfish and more. Versatile directions allow for both indoor and outdoor applications. And **Complete** is long-lasting to help reduce callbacks and deliver **Complete** customer satisfaction. With Maxforce **Complete** as part of your IPM program, you will provide low impact service with the high performance results you've come to expect from Maxforce.

**MAXFORCE**  
**COMPLETE**

# WHEN YOUR BAIT IS COMPLETE, YOU CAN ACTUALLY SEE THE DIFFERENCE.

*The darker the granule the higher the protein content.*

## The Complete recipe for success:

- Maxforce Complete is unique. The overall formula includes protein, simple sugars, fats and complex carbohydrates. However, granules within the formula contain different combinations of these irresistible food ingredients. These combinations accommodate the changing food preferences of a broad spectrum of pests and deliver superior bait acceptance throughout the year.
- An ideal range of low density particle sizes can be carried by various pests, from the smallest ants to the largest cockroaches. The combination also enables you to reduce the number of products you need to carry.

## Broad-spectrum control

- Ants, Cockroaches, Crickets, and Silverfish
- Pharaoh's, Fire, Argentine, Thief, Acrobat, Carpenter, Pavement, Crazy, Ghost, Odorous and Big-headed Ants

## Flexible label directions

- Indoor and outdoor use for residential and commercial accounts
- Apply to cracks and crevices; perimeter, mound, or broadcast treatments; or to attics and crawl spaces

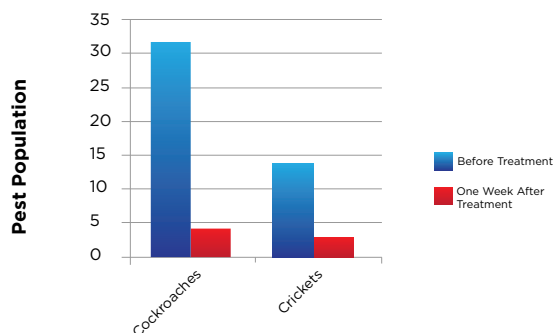

## How it works

It takes a superior food matrix plus the right active ingredient to deliver total colony elimination. Maxforce Complete contains 1% hydramethylnon, which prevents pests from turning food into energy. It also features the exclusive Maxforce Domino Effect™, a delayed action secondary kill, where social insects like ants unknowingly share the bait with the rest of the colony.

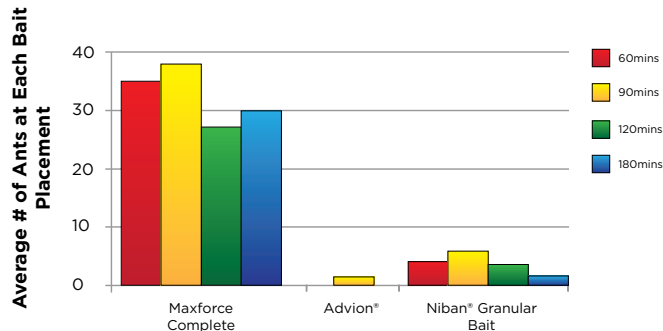

## Expect high performance and low impact when Complete is part of your IPM program.

- Complete is low dose (less than 7 grams of active ingredient per acre for broadcast applications), minimizing the amount of pesticide needed
- The half-life of hydramethylnon in soil is long enough to get the job done, but short enough to fit IPM standards
