

PREMISE® FOAM IN A CAN. READY WHEN YOU ARE.

NO MEASURING, MIXING OR WAITING AROUND.

Only Premise Foam gives you perfect foam in seconds.

- With the ready-to-use 18-ounce Premise Foam can, you start killing termites instantly.
- No bulky equipment needed.
- No setup time or mixing concerns.
- Premise Foam lets you attack your customers' termite problem on the spot.

FAST AND EASY TO USE.

Premise Foam is ideal for targeted applications.

- Get precisely formulated dry foam every time, under any conditions.
- Premise Foam expands at a 30:1 ratio to thoroughly cover hard-to-reach areas such as inside termite galleries, wall voids, floor joists and more.
- The long-lasting residue delivers long-term termite control.

TERMITE CONTROL AT THE PUSH OF A BUTTON.

If necessary, drill a small hole to receive the injector tip, then simply push the button. Premise Foam is dispensed at approximately 0.2 fluid ounces of liquid formulation or 50 cubic inches of foam per second.

To minimize runoff, continue to hold the injector tip firmly against the injection point for 5 seconds after releasing the trigger to allow product from the application hose to fully expand into the application area.

Apply to termite gallery or termite-infested void.

TAP THE POWER OF PREMISE FOAM IN A CAN.

Take advantage of the long-lasting, effective termite control only Premise can deliver.

- Only Premise Foam provides termite-killing action this easy to use.
- Premise Foam is the only non-repellent termiticide available in an instant, portable foam.
- Customers trust Bayer to protect their families' health. They'll trust Bayer – and you – to protect their homes, too.
