

NEW ACTUATOR

FUSE[®] FOAM

Ready-to-Use Termiticide/Insecticide

Fuse Foam has a new flip-up actuator. This new feature makes Fuse Foam:

- Allows PMPs to use the product with just one hand
- Easier to use in tight and confined spaces
- Treating wall voids is easier
- Keeps you safer when using the product when on a ladder

Fuse Foam is a **Combination Chemistry[®]** product that utilizes both Fipronil and Imidacloprid in a ready-to-use, expanding foam. **Fuse Foam** gives PMPs the opportunity to begin treating a structure for termites immediately, right on the sales call; then schedule the full treatment for later.

Fuse Foam could be the most important tool in the toolbox when it comes to stopping termites and ants, and preventing their spread inside a structure. With a 30:1 expansion ratio,

Formulation: Ready-to-use Foam

Features & Benefits

Contains Fipronil and Imidacloprid: The same proven, non-repellent active ingredients as our **Fuse[®] Termiticide/Insecticide**, but in a ready-to-use foam that is easy-to-apply.

For Direct Injection: Into termite and ant nests and galleries, structural voids, and other listed sites.

Active Ingredients

0.005% Fipronil
0.025% Imidacloprid

Effective Against

Termites, ants, wood-boring beetles, some occasional invaders

Use Sites

For use in and around structures and limited outdoor spot treatments

Packaging

6 x 15 Ounce Can

Mode of Action

Interrupt the insects' nervous systems
