ABOUT THE ACTIVE INGREDIENTS

Zoecon[®] Petcor^{®2} Flea & Tick Spray features (S)-methoprene, an insect growth regulator (IGR). This molecule prevents flea arvae from developing into nuisance breeding, biting adults. While (S)-methoprene disrupts the reproductive cycle, Etofenprox, affects the insect's nervous system following direct contact or ingestion.

APPLICATION RATES

- Refer to the Zoecon[®] Petcor^{®2} Flea & Tick Spray label for complete application instructions. Follow all label directions.

Visit Zoecon.com to see how you can help keep your pet insect free with Zoecon[®] Petcor^{®2} Flea & Tick Spray.
