

FUSE® FOAM

Ready-to-Use Termiticide/Insecticide

Contains Fipronil and Imidacloprid: The same proven, non-repellent active ingredients as our Fuse® Termiticide/Insecticide, but in a ready-to-use foam that is easy-to-apply.

For Direct Injection: Into termite and ant nests and galleries, structural voids, and other listed sites.

Fuse Foam is the latest addition to the Control Solutions Inc. (CSI) family of products for managing termites and other wood destroying pests. This **Combination Chemistry®** product utilizes both Fipronil and Imidacloprid in a ready-to-use, expanding foam. **Fuse Foam** gives PMPs the opportunity to begin treating a structure for termites immediately, right on the sales call; then schedule the full treatment for later.

Fuse Foam could be the most important tool in the toolbox when it comes to stopping termites and ants, and preventing their spread inside a structure. With a 30:1 expansion ratio, **Fuse Foam** gives PMPs the ability to reach those tough-to-treat places with confidence.

Active Ingredients	0.005% Fipronil 0.025% Imidacloprid
Effective Against	Termites, ants, wood-boring beetles, some occasional invaders
Packaging	6 x 20 oz/case (136 cases/pallet)
Application Rate	Ready-to-Use foam
Modes of Action	Interrupt the insects' nervous systems
Signal Word	Caution
